Your bio-scanner shows the zone's ecological void as sharply as a wound. Linguistics translates system logs. Medicine reads Marr's condition. In Act Three the system displays your xenobiological profile – it catalogued you as a variable the moment you arrived. KEY: Science (Xenobiology) · Linguistics · Medicine

Serenthis calls you by name before you introduce yourself. Your training recognises neurological encoding, not just language. Something has been written into her. The bond runs through you.

EVENT 95 – A QUESTION OF SINGULARITY

Awareness makes you first to notice repetition. You'll set perimeters when no one else thinks to. In Act Three, when Vorn orders withdrawal, the crew looks to you: follow orders, or stay for the science?
KEY: Awareness · Tactics · Combat if loops turn physical

EVENT 96 – IS LOVE THE ANSWER?

You read Ghresh-Ka before the crew does – converging, not hostile yet. If RR'raan challenges him directly, back them. It's the only gambit. Your job if it goes to a fight is to buy time, not to win.
KEY: Tactics · Awareness · First Aid if crew hit

The diagram illustrates the distribution of HP values across different body parts of a horse. The central node is the **BODY** (5 HP, range 01-07). It is connected to six peripheral nodes: **L HEAD** (3 HP, range 20), **R HEAD** (3 HP, range 19), **L NECK** (3 HP, range 15-16), **R NECK** (3 HP, range 17-18), **R FORE** (3 HP, range 08-10), and **L FORE** (3 HP, range 11-12). The **REAR LEG** (3 HP, range 13-14) is shown at the bottom but is not connected to the central body node.

Your Engineering immediately flags the Spire drawing power far beyond stated function. Science (Physics) + Computer crack the logs together. In Act Three, you can feed the system the structural data it needs. KEY: Engineering · Science (Physics) + Computer · Pilot for exit

EVENT 96 – IS LOVE THE ANSWER?

The vault power draw is active. Engineering tells you it is running. Vorn's weather warning is your cue to calculate extraction windows. You'll be flying the landing craft home through whatever the storm is. KEY: Engineering · Pilot for Act 3 extraction · Repair if needed

EQUIPMENT

```
Engineer's toolkit (full)
Portable power cell (2)
Flashlight-laser
Gravity planer (engineering tool)
Diagnostic scanner

The quiet zone is a perfect geometrical absence – nothing matches it. Your Awareness spots the overlapping footprints before anyone else. In Act Three the system's display of your data is cartographic. KEY: Awareness · Navigation for zone tracking · Planetology

Survival (Ringworld) is the crew's critical skill when weather drops. When Vorn gives the two-hour window, you calculate if it's achievable. Your Navigation makes you the extraction planner.
