EVENT 95 A QUESTION OF SINGULARITY

The quiet zone is wrong to you before the instruments confirm it — prey-senses detect total absence of biological signals. Awareness and Tracking matter in Act One. In Act Three: a threat you cannot engage directly. The frustration is your roleplay challenge.

► Awareness & Tracking Act 1 · CON×5 descent roll · Survive Act 3 without fighting

EVENT 96 IS LOVE THE ANSWER?

Shresh-Ka is Kzin. Patient — which you read as contempt. In Act Three you have an option no one else does: challenge him one-on-one, Kzin honour code. Pauses his force. Buys time. May get you killed. May not.

► Intimidate (the challenge) · Awareness for approach · Combat if honour demands

EVENT 95 A QUESTION OF SINGULARITY

You will identify the mass event as a constructing singularity before anyone else. Puppeteers process information as leverage before sharing it. Computer + Science (Physics) cracks the system logs. In Act Three you understand the system's logic better than anyone.

► Computer + Science (Physics) for logs · Research for Pak refs · Tactics Act 3

EVENT 96 IS LOVE THE ANSWER?

You will recognise what Serenthis is — a Rememberer partially encoded with Protector-class repair intelligence. You will not share this immediately. When you do, time it for maximum effect. Persuade and Fast Talk are your Act Three weapons.

► Persuade/Fast Talk with Ghresh-Ka · Research: the encoding · Awareness: Serenthis

EVENT 95 A QUESTION OF SINGULARITY

Your Engineering flags immediately that the Spire draws power far beyond stated function. Science (Physics) + Computer crack the logs together. In Act Three, if anyone can feed the system the structural data it needs for a clean calculation, it's you — you understand what it's asking for.

► Engineering for the Spire · Science (Physics)+Computer for Logs · Repair for kit

EVENT 96 IS LOVE THE ANSWER?

The vault's power draws are active, not passive. In Act Two Vorn's weather warning is your cue to calculate extraction windows. You'll be flying the landing craft home. Your Engineering gives you the best read on whether the vault structure is safe.

► Engineering for the vault · Pilot for extraction window · Computer comms

EVENT 95 A QUESTION OF SINGULARITY

Seventeen zones surveyed. The quiet zone is a perfect geometrical absence — no survey record resembles it. Your Awareness picks up the overlapping footprint patterns in Act One. You track crew position relative to the Spire constantly. In Act Three the system's personalised display is cartographic: it has mapped your mapping.

► Awareness for loop clues · Navigation for zone tracking · Science (Geology) anomalies

EVENT 96 IS LOVE THE ANSWER?

You know Ringworld terrain. Survival (Ringworld) is the crew's primary asset when weather deteriorates in Act Two. When Vorn gives the two-hour window, you're doing the maths on whether it's achievable. Your Navigation makes you the extraction planner.

► Survival (Ringworld) Act 2 · Navigation for exit routes · Awareness for approach
