Parry: Weapon skill, 1 impulse, damage to weapon

Special Success: ≤ skill÷5    Fumble: top 1/20th of fail range

EVENT 95

A QUESTION OF SINGULARITY

Your bio-scanner shows the quiet zone's ecological void as sharply as a wound – no microorganisms, no fungi, nothing. This is biologically impossible. Linguistics helps translate system logs in Act Two; Medicine tells you what Marr's neurological state means. In Act Three the system's display of your profile will be xenobiological – it catalogued you as a variable the moment you crossed the boundary.

► Science (Xenobiology) Act 1 · Linguistics for logs · Medicine for Marr

EVENT 96

IS LOVE THE ANSWER?

Serenthis calls you by name before you introduce yourself. Your training recognises something neurological, not merely cultural – her communication patterns don't map to any language, they map to distributed data encoding. Something has been written into her. Pay attention to what she doesn't say. The bond runs through you.

► Linguistics with Serenthis · Awareness: the woven bands · Persuade in Act 3

Dodge: DEX×3%, 1 impulse, vs melee only

Parry: Weapon skill, 1 impulse, damage to weapon

Special Success: ≤ skill÷5 Fumble: top 1/20th of fail range

EVENT 95

A QUESTION OF SINGULARITY

Your job is keeping everyone alive in a situation with nothing to shoot. Awareness makes you first to notice repetition. You'll set perimeters instinctively. When the loops tighten in Act Two, you're doing threat assessment on something you can't classify. In Act Three, when Vorn orders withdrawal, the crew looks to you: follow orders or stay?

► Awareness throughout · Tactics Act 3 · Combat if loops turn physical

EVENT 96

IS LOVE THE ANSWER?

You read Ghresh-Ka correctly before the crew does – not hostile yet, converging. Tactics will shape your Act Three extraction plan. If RR'raan challenges Ghresh-Ka to single combat, back them immediately – it's the only viable gambit. Your job in a fight isn't to win. It's to buy time.

► Tactics for extraction · Awareness for Ghresh-Ka approach · First Aid if hit

Dodge: DEX×3%, 1 impulse, vs melee only

Parry: Weapon skill, 1 impulse, damage to weapon

Special Success: ≤ skill÷5    Fumble: top 1/20th of fail range

EVENT 95

A QUESTION OF SINGULARITY

The quiet zone is wrong before your instruments confirm it — your prey-senses register total absence of biological signal across a wide radius. You feel it as an instinctive wrongness. Awareness and Tracking matter in Act One. In Act Three you face a threat that cannot be fought directly. The frustration of that is your roleplay challenge.

► Scent + Awareness Act 1 · Track for expedition evidence · CON ×5 for descent disorientation

EVENT 96

IS LOVE THE ANSWER?

Ghresh-Ka is Kzin. He is patient — which you read as contempt. In Act Three you have a single option no other crew member has: challenge him one-on-one, Kzin honour code. This pauses his force. It buys time for the crew. It may get you killed. It may not. Choose.

► Intimidate (the challenge) · Awareness for Ghresh-Ka approach · Combat if honour demands

EVENT 95

A QUESTION OF SINGULARITY

You will identify the mass event as a constructing singularity before anyone else does. Puppeteers process information as leverage before sharing it as assistance. Computer + Science (Physics) cracks the system logs in Act Two. In Act Three you understand the system's logic better than anyone else — you may be the one who can figure out what to give it.

► Computer + Science (Physics) for logs · Research for Pak refs · Tactics for Act 3 options

EVENT 96

IS LOVE THE ANSWER?

You will recognise what Serenthis is — a Rememberer partially encoded with Protector-class repair intelligence — the moment you observe her properly. You will not share this immediately. When you do share it, time it carefully. In Act Three, your Persuade and Fast Talk are the crew's primary tool when Ghresh-Ka's force arrives.

► Persuade/Fast Talk with Ghresh-Ka · Research to identify encoding · Awareness for Serenthis

Special Success: ≤ skill÷5 Fumble: top 1/20th of fail range

EVENT 95

A QUESTION OF SINGULARITY

Your Engineering flags immediately that the Spire is drawing power orders of magnitude beyond its stated function. Science (Physics) and Computer work together in Act Two to crack what the system is actually doing. In Act Three, if anyone can feed the system the structural data it needs for a clean calculation, it's you – you understand what the machine is asking for.

► Engineering for the Spire · Science (Physics)+Computer for logs · Pilot for emergency exit

EVENT 96

IS LOVE THE ANSWER?

The vault's power draw is active, not passive – something is running in there. Engineering tells you the structure is currently in operation. In Act Two, Vorn's weather warning is your cue to calculate extraction windows against the deteriorating conditions. You'll be flying the landing craft home through whatever the storm becomes.

► Engineering for the vault · Pilot for Act 3 extraction · Repair if kit takes damage

COMBAT MODIFIERS

| SITUATION              | MODIFIER             |
|------------------------|----------------------|
| Point-blank (≤DEX m)   | ×1.5 (auto if still) |
| Short range            | Normal skill         |
| Medium range           | ±2 skill             |
| Long range             | ±4 skill             |
| No aim (snap)          | ±4 skill             |
| Half aim               | ±2 skill             |
| Moving target (angled) | ±2 skill             |
| Darkness               | ≈10% chance          |

Dodge: DEX×3%, 1 impulse, vs melee only

Parry: Weapon skill, 1 impulse, damage to weapon

Special Success: ≤ skill÷5    Fumble: top 1/20th of fail range

EVENT 95

A QUESTION OF SINGULARITY

Seventeen survey zones and nothing resembles this. The quiet zone reads as a geometrical absence — perfectly circular, perfectly empty. Your Awareness picks up the overlapping footprint patterns before anyone else in Act One. You're tracking crew position relative to the Spire continuously. In Act Three the system's display of your data is cartographic — it has mapped your mapping of it.

► Awareness for loop clues · Navigation for zone tracking · Science (Geology) anomalies

EVENT 96

IS LOVE THE ANSWER?

Wheel-Spoke sits near territory you've surveyed. Survival (Ringworld) is the crew's most critical skill in Act Two when the weather deteriorates. When Vorn gives the two-hour window, you're doing the maths on whether it's physically achievable and what it costs. Your Navigation makes you the extraction planner.

► Survival (Ringworld) Act 2 · Navigation for exit routes · Awareness for Ghresh-Ka approach
